DEN-400ML	N95 Filters, Medium/Large

Comfort-Air 400N_xMD Complete P100 Cartridges

ESBE Item ID	Description
DEN-4MLNXMDLP0	Small/Medium
DEN-4SMNXMDLP0	Medium/Large

Protecting those who protect us!

Safer

Air-tight seal. Safer than disposables N95's, with two-way filtration in & out. Suitable for COVID virus in accordance with CDC guidelines & non-oil based aerosols.

Unique Design

Low profile facepiece occupies less of the face while providing greater comfort. Compact shape and cartridges reduces possibility of interference with other medical equipment during patient care. Cartridges can be adjusted into 3 different positions. Improves visibility & fits under face shields.

Less Waste, Less Cost

Reduced filter replacement, less waste. Reduces consumption costs dramatically. Environmental savings of 6,673lbs of waste diverted a year.

NIOSH Approved

N95 or P100 filters

Enhanced Comfort

"In terms of comfort, the fit is much gentler on your face, more comfortable and just miles ahead of any disposable option I've tried. As Health care workers we all know too well the harsh effects of wearing masks for long periods of time, but with the Comfort-Air[®]N_xMD, face rashes/acne are no longer a constant issue for our staff." – Dr. O'Toole

THE TRUE COST OF DISPOSABLE N95 RESPIRATORS

At the average cost of \$2.00 per mask, what are disposable N95 Respirators really costing you AND the environment?

The FDA now mandates that Medical & Healthcare Professionals are required to dispose of FFR's after each patient interaction. If just one Healthcare Professional sees a minimum of 5 patients a day, that's 5 disposable respirators a day that get tossed in the waste after each use. Now think about all the staff in dental clinic, medical lab or in a hospital that require N95's and that number quickly multiplies.

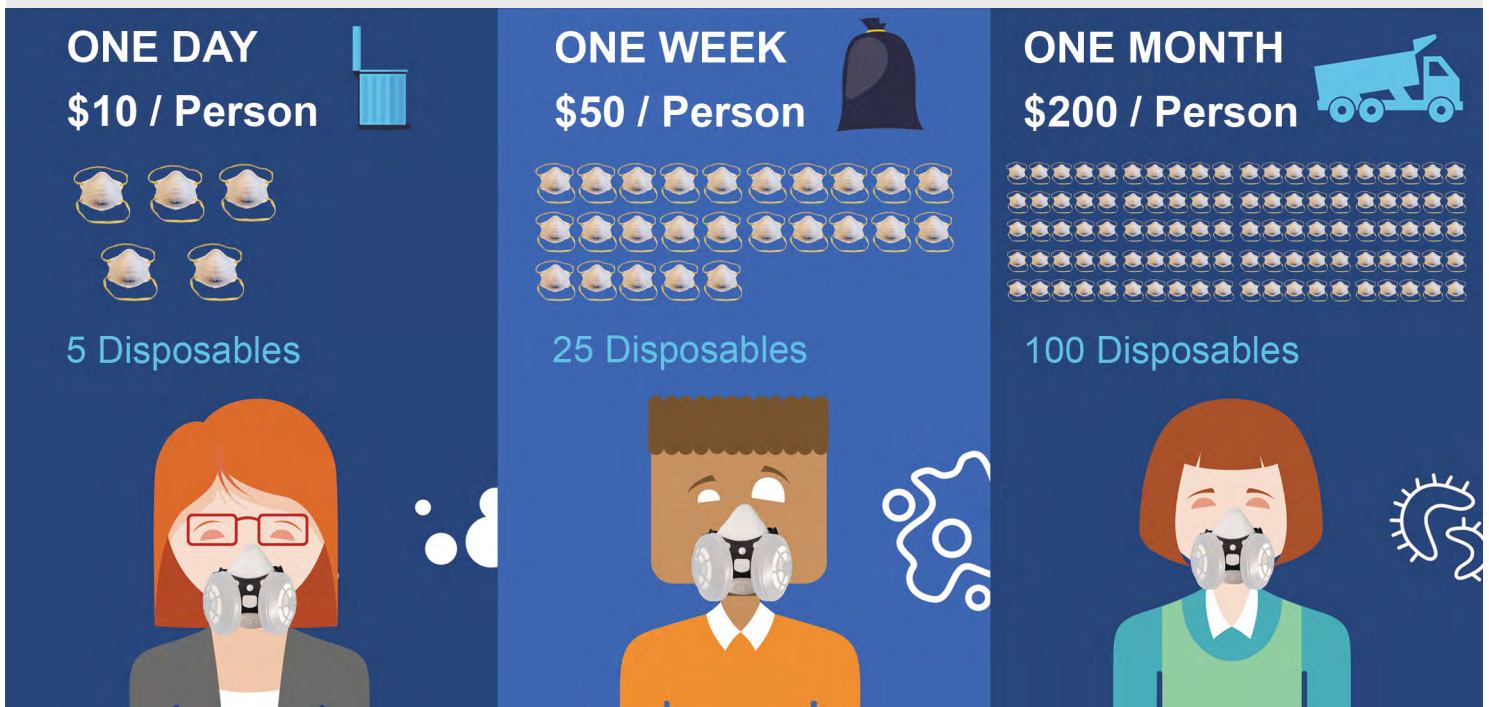

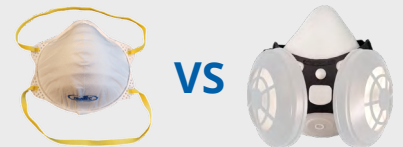

A Safer & Healthier Solution for the Planet and Your Bottom line!

The NEW **Comfort-Air®NxMD Reusable Respirator** WITHOUT an exhalation valve has proven a 95% in Waste Reduction and a 90% Reduction in Costs spent on NIOSH approved respirators!

According to the CDC Guidelines on Reusable Elastomeric Respirators in healthcare, the **Comfort-Air®NxMD** Series Respirator Filter can last up to a year when disinfected in accordance with the guidelines.

DO THE MATH!

The costs associated with disposable respirators VS the price of just one Comfort-Air®NxMD Reusable Respirator piles up just as quickly and high as the amount of N95 waste being sent to land fill. Not to mention your waste hauling fees.

"Comfort-Air®NxMD is so much more cost effective! I would pay \$3-\$4/ per disposable mask and in dental office you are easily Going through 40 a day"

"Environmentally, the Healthcare industry must move this way towards reusable respirators like the Comfort-Air®NxMD. It doesn't make sense with the sheer volume of waste from disposable masks, we can't keep doing this. We have a moral responsibility to make a shift." – Dr. O'Toole
