# Low Retention Filter Tips

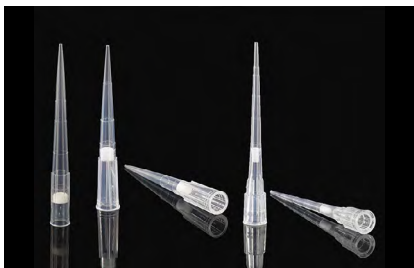

Universal Pipette Tips are certified free from DNase, RNase, Pyrogens and PCR inhibitors. Low Retention Filter tips would be ideally suited to highly sensitive PCR work. They are also free from lubricants and heavy metals. These Universal Pipette Tips have an innovative tip design for adaptability and compatibility with a wide range of pipettes from different manufacturers. They are also designed to have a very low force requirement for tip loading and tip ejection with pipettes.

- Low Retention
- Sterile
- Racked
- 96 tips/rack, 10 racks/pack

## Autoclave Bags For Biohazardous Infectious Materials

Our ESBE Brand autoclave bags are used by various medical organizations for the sterilization of utensils and waste. Our bags meet the demand for higher autoclaving temperatures with an extremely low failure rate.

- Sterilization at higher temperatures – 135°C for 30 minutes
- Hermetically sealed edges – no need for double bagging
- Unprinted and printed with biohazard warning
